1 Introduction

Ayla DSN reservation allows module manufacturers to put aside DSN's for future use. This document describes the process of reserving and using reserves DSN's.

1.1 Audience

This document is written for module manufacturers and OEM Admins.

1.2 Related Documentation

OEM Dashboard User Guide (AY006UDB3)

2 DSN Overview

2.1 Ayla Platform Module Categories

Black box is fully-managed, Ayla-enabled module to be used as-is by the manufacturer. Some primary characteristics include:

- Available for embedded solutions
- Fastest time to market for OEMs
- No custom gateway or other forms of communication agent software (including QA required regardless of the type of end-device)
- Enabled with any microcontroller-based system with cloud connectivity

White box is a type of Ayla-enabled module that gives the OEM control of the device function design compared to the Black-Box. However, this leads to a development effort that is significantly longer for OEMs – and results in longer time to market. Some primary characteristics include:

- Available for embedded or LINUX solutions
- Ayla Cloud Agent is available as a library or source
- Well-equipped for applications with existing RTOS and networking
- Cloud Agent's modular design allows code for additional functions
- In certain situations, allows a reduced bill of material (BOM) cost

2.2 Ayla Platform OEM Types

Access to operations and module availability in Factory Actions is controlled by the Ayla platform OEM Type. The OEM Types are set by Ayla Professional Services for each OEM. Table 1 provides descriptions of the Ayla platform user types.

- **Module Manufacturer** - A manufacturing organization producing Ayla-enabled, fully managed modules (also referred to as Black Box modules) for use by the Managed Module Device Manufacturer.
- **Managed Module Device Manufacturer** - An organization (typically manufacturing) with end-user devices or embedded gateways that are based on Ayla-enabled, fully managed modules (also referred to as Black Box modules).
- **Linux Gateway Manufacturer** - An organization (typically manufacturing) with Linux-based gateways that are based on Ayla's open gateway agent software framework.

2.3 Ayla Platform User Roles

Access to operations in factory actions is controlled by user roles. The user roles are set by the OEM admin for each OEM user.

These are the user roles available within the Ayla Platform:

OEM::ModuleManufacturer :

- Reserve the DSNs for Black Box module manufacture (click on Reserve button).
- Upload the manufacturing file (Upload Manufacture File button).

NOTE To be granted this role, the Ayla Support staff must set the Ayla Platform OEM Type to Module Manufacturer for this OEM.

- Search for already manufactured device for the selected module.

OEM::ModuleOEMManufacturer (AKA Black Box Device Manufacturer):

- Upload the provisioning file (Upload Provision File button).
- Search for devices that belongs to the current OEM.

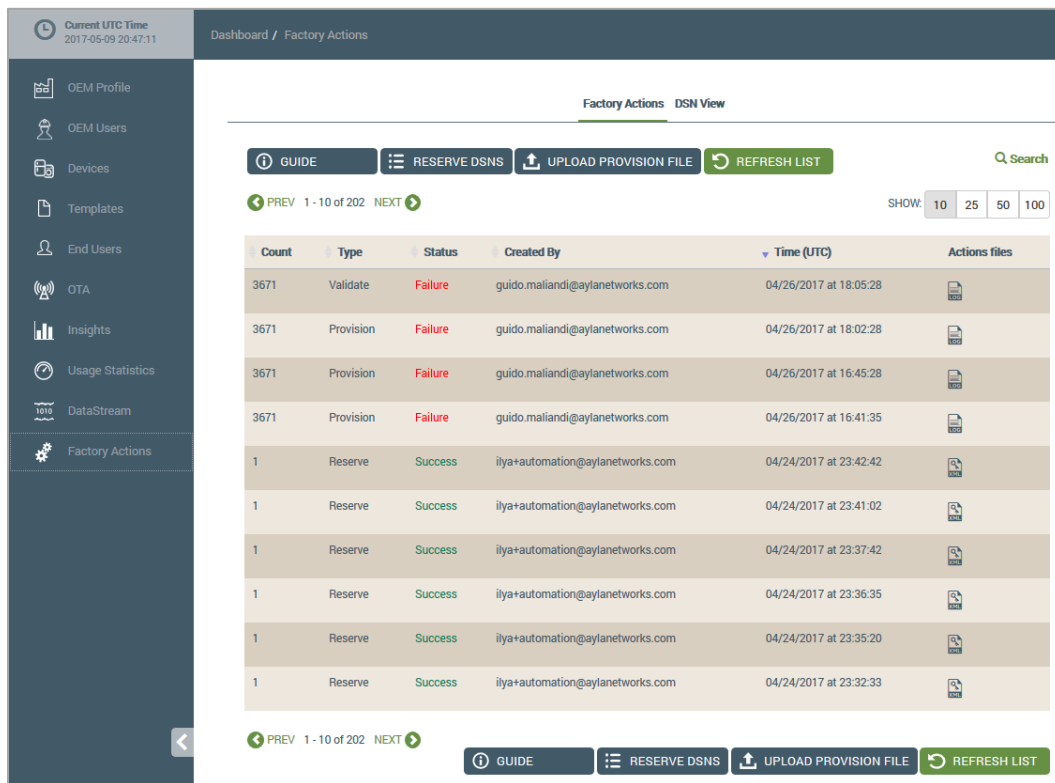

OEM::SoftwareOEMManufacturer (AKA White Box Device or Gateway Manufacturer):

- Reserve device for white box (Reserve button).
- Upload provisioning file (Upload Provision File button).
- Search for device belonging to the current OEM.

OEM::Admin:

- If OEM has Module Manufacturer attribute set, user with OEM::Admin role has the same access to Factory Actions as user with OEM::ModuleManufacturer role.
- If OEM does not have Module Manufacturer attribute set, user with OEM::Admin role has same access to Factory Actions as a user with OEM::ModuleOEMManufacturer or OEM::SoftwareOEMManufacturer role.

GUIDE RESERVE DSNS UPLOAD PROVISION FILE REFRESH LIST

Table column description:

- **Count** – A count of how many devices were included in the action
- **Name** – name of the action
- **Type** – type of action
- **Status** – result of action
- **Created By** – email of the individual that initiated this factory action
- **Time (UTC)** – date/time the factory action was started
- **Actions** – user action for this factory action

Button descriptions:

- **GUIDE** – displays Factory Actions Guide dialog box with button descriptions.
- **RESERVE DSNS** – Reserve a set of DSNs for manufacturing.
- Context (based on user role), one of these buttons will display:
 - **UPLOAD PROVISION FILE** – upload the device details set during the Manufacturing process at a Module Manufacturer OEM's site.
 - **UPLOAD MANUFACTURING FILE** – upload device details set during the Provisioning process at a OEM Manufacturer's site.

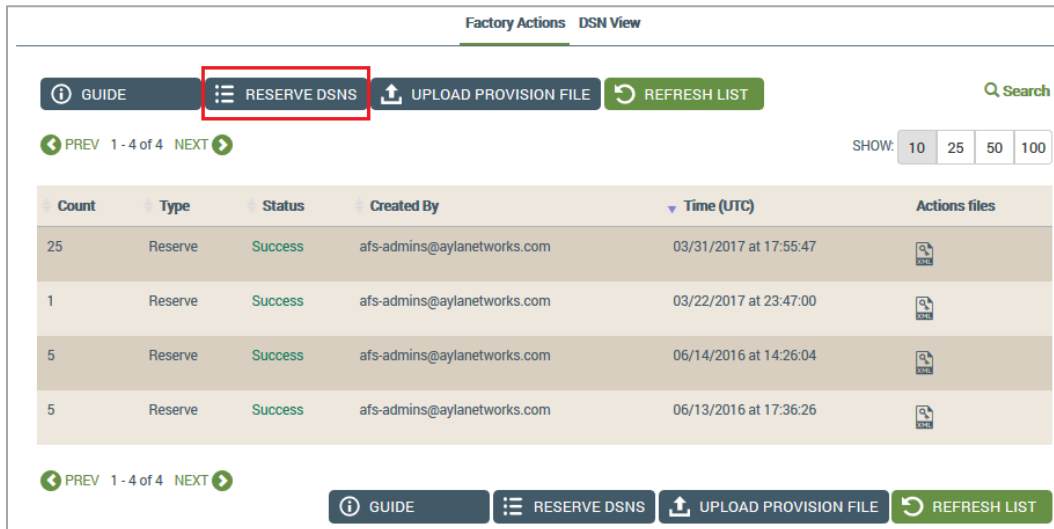

3 Reservation Process

The steps for module manufactures are shown below. Use the OEM Dashboard to complete these steps.

1. Log on to the OEM Dashboard.
2. On the OEM Dashboard Navigation Panel, click **Factory Actions**.

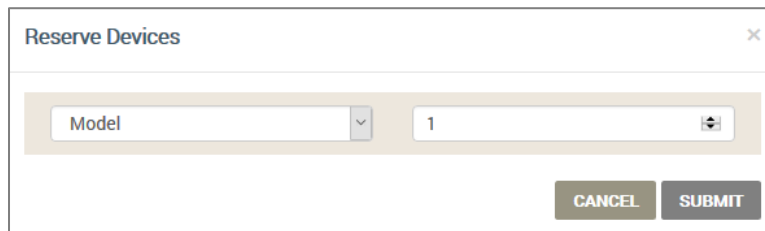

3. On the Factory Actions page, click **RESERVE DSNS**.

Count	Type	Status	Created By	Time (UTC)	Actions files
25	Reserve	Success	afs-admins@aylanetworks.com	03/31/2017 at 17:55:47	
1	Reserve	Success	afs-admins@aylanetworks.com	03/22/2017 at 23:47:00	
5	Reserve	Success	afs-admins@aylanetworks.com	06/14/2016 at 14:26:04	
5	Reserve	Success	afs-admins@aylanetworks.com	06/13/2016 at 17:36:26	

4. On the Reserve Devices dialog box:

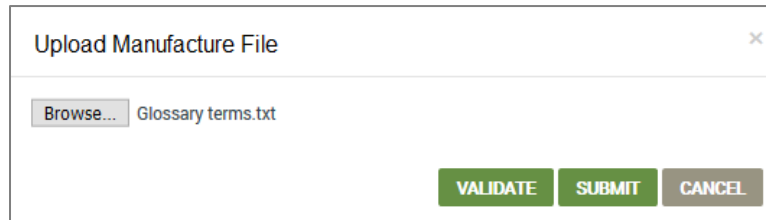

- a. Select from the **Model** drop-down list.
- b. Directly enter (or use up-down arrows to select the quantity).
- c. Click **SUBMIT**.

4 Black Box

4.1 Black Box (module manufacturer)

1. On the table listing, click **UPLOAD MANUFACTURE FILE**.  This shows the Upload Manufacture File dialog box.

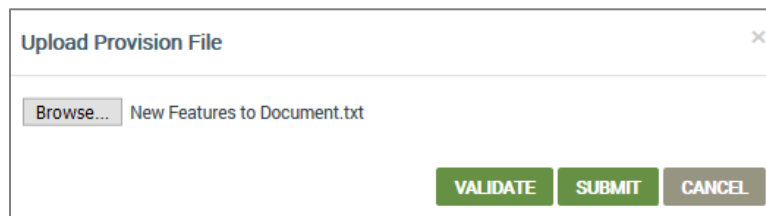

2. Click **Browse** to locate and select the file.
3. Click **VALIDATE** (this inspects the file to ensure correct information and formatting).
4. If there are errors found, collect the upload file.
5. When validated, click **SUBMIT**.

NOTE SUBMIT can also be selected without validation. Any DSNs with errors will not be uploaded into the Ayla platform. Any errors will be shown in the log file found under the Actions column. The DSN entries in the upload file that cased the error can be corrected and uploaded. Any successful DSN entry should be removed or they will receive errors as duplicates.

4.2 Black Box (device manufacturer)

1. On the table listing, click **UPLOAD PROVISION FILE**.  This shows the Upload Provision File dialog box.

2. Click **Browse** to locate and select the file.
3. Click **VALIDATE** (this checks the file to ensure correct information and formatting).
4. If there are errors found, collect the upload file.
5. When validated, click **SUBMIT**.

NOTE SUBMIT can also be selected without validation. Any DSNs with errors will not be uploaded into the Ayla platform. Any errors will be shown in the log file found under the Actions column. The DSN entries in the upload file that caused the error can be corrected and uploaded. Any successful DSN entry should be removed or they will receive errors as duplicates.

4.3 White Box Manufacturer

1. On the table listing, click **UPLOAD PROVISION FILE**.  This shows the Upload Provision File dialog box.

2. Click **Browse** to locate and select the file.
3. Click **VALIDATE** (this checks the file to ensure correct information and formatting).
4. If there are errors found, collect the upload file.
5. When validated, click **SUBMIT**.

NOTE SUBMIT can also be selected without validation. Any DSNs with errors will not be uploaded into the Ayla platform. Any errors will be shown in the log file found under the Actions column. The DSN entries in the upload file that caused the error can be corrected and uploaded. Any successful DSN entry should be removed or they will receive errors as duplicates.
